- LLMs, AI agents, Stable Diffusion
- Python, Jupyter Notebook
- Git, performance profiling
- UEFN, Verse

LANGUAGES

- French (Native)
- English (Fluent)
- German (Basics)

ABOUT ME

I'm a game developer with experience in Unity, UI systems, VFX integration and gameplay features for desktop, mobile and VR projects. At OZWE Games, I worked on Meta Horizon projects, AI-assisted tools, NoesisGUI interfaces and PopcornFX effects. I also build personal games, visual experiments and interactive prototypes.

WORK EXPERIENCE

OZWE Games

2024 - 2026

Software Developer & Technical Artist

- Created and integrated VFX using PopcornFX.
- Implemented UI systems in NoesisGUI and CSS-like styling workflows.
- Worked on Meta Horizon projects.
- Built AI-assisted tools and prototypes using LLMs, agents and image generation pipelines.
- Developed AI agent skills for code and game generation.
- Developed gameplay features for desktop, mobile & VR experiences.
- Led UI technical development and coordinated implementation with artists.
- Attended Meta Horizon Summit 2026 in London with OZWE Games.

OZWE Games Internship

June - August 2023

Junior Software Developer & Technical Artist

- Implemented gameplay features and debugging tools.
- Created and integrated VFX using PopcornFX.
- Supported QA testing and iteration for VR experiences.

EPFL, Scala Center

2020 - 2023

Teaching Assistant

EPFL, Digital Humanities Laboratory

Spring 2020

Teaching Assistant

SELECTED PROJECTS

Master Thesis

Prototyped an LLM-based reflection pipeline that updates NPC preferences and influences character behavior based on each NPC's personality, goals and context.

Knock Everyone off the Map

Created a Roblox game from concept to release, covering gameplay and visuals.

VFX Experiments

Personal visual experiments focused on particles and artistic presentation
